for challenge wireshark#2 we are given a file name challenge.pcapng

first open the challenge.pcapng go to FILE > EXPORT OBJECTS > HTTP and we found secret.zip

Save the secret.zip file.i tried to unzip the file but its corrupted file so i fix it with command zip -FF secret.zip --out repaired.zip. next im try to unzip the file but it got password so i use fcrackzip tool to brute the password
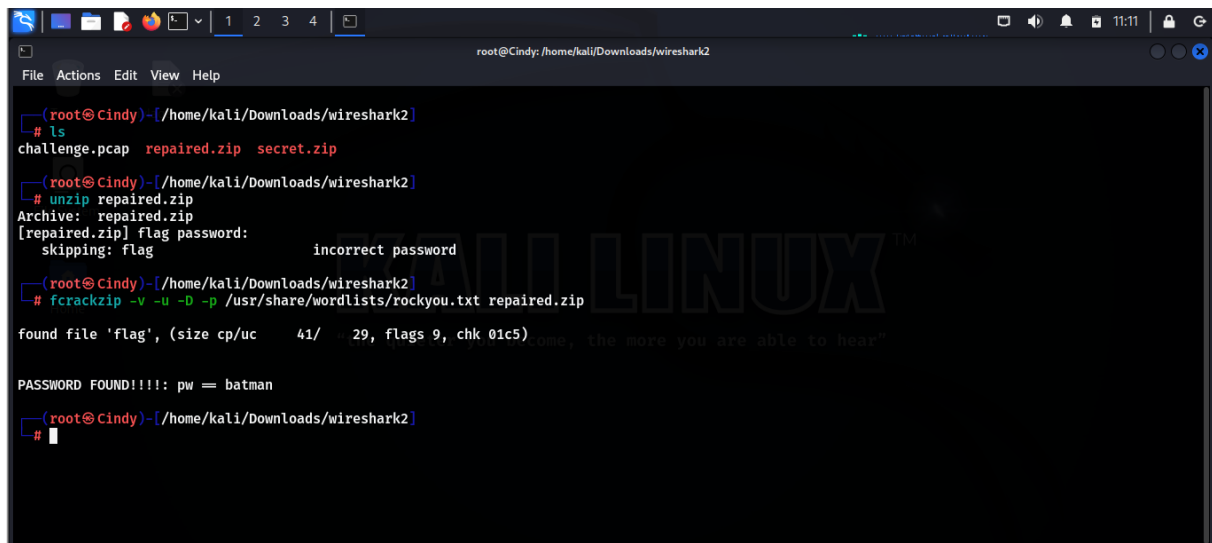

After unzip the repaired.zip file with the password i got .it give us flag file and its the flag GCTF2023{C0rrupted_Z1p_f1l3s}
